It's All About Global Connections...

CineLATAM will bring industry executives from exhibition and distribution along with vendors that drive business in the Latin American region together to information share, network and close the gap working directly with the decision makers.

CineLATAM is an experiential event providing networking opportunities within an intimate business setting.

The Showcase package is designed exclusively for cinema vendors to help promote their products, technologies, and services to the major cinema chains across the LATAM region. Instead of the traditional ballroom trade show, your company's designated space will be in the open

CineLATAM Foyer, giving you more opportunities to engage with your industry peers during the week of the conference.

The items included are designed to help you highlight the very best your company has to offer and allow you time to interact with potential and existing clients, schedule future appointments, as well as make it cost effective for your company's bottom line.

CineLATAM is committed to infusing resources to expand the theatrical experience in Latin America and its continued growth within this global market.

Networking Package
